FZ FORZA®

INNOVATED IN DENMARK

COLLECTION 2021/2022

FZ FORZA

We are pleased and proud to present to you our new 2021 collection – with many upgrades and new products.

As usual you find a lot of new cool textile styles – many of them produced from polyester, recycled from plastic bottles. The power range of rackets has been renewed and made into two new series. You will also find a totally rejuvenated and improved shoe range and three new bag series. All in all, a collection that we believe will be the perfect one, to help the badminton community get back on track after a turbulent period with covid-19.

Besides using recycled polyester, we are also working on other projects to be more environmentally friendly and focus more on the health of our planet. You will see some products have changed packaging and you will of already noticed that this catalogue has changed it's look and is now printed on recycled paper. We firmly believe and hope that you will agree with us, that this is the right way forward.

We are looking forward to see you all back on court!

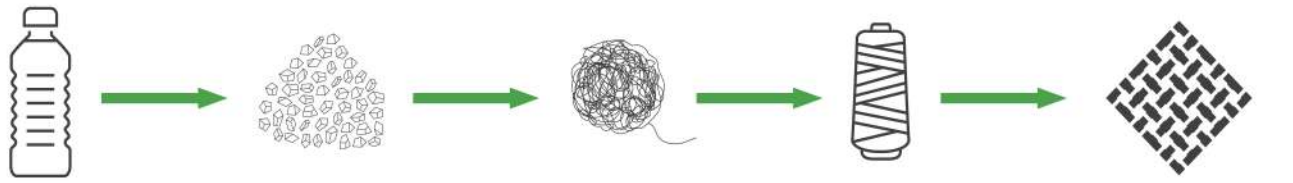
FZ FORZA®
INNOVATED IN DENMARK

THE MOST RESPONSIBLE WAY OF PLAYING BADMINTON
DON'T TURN YOUR BACK TO THE WORLD, NATURAL RESOURCES ARE NOT ENDLESS

Recycled polyester

Play badminton with a green mind set. Most of the new FZ FORZA collection is made of polyester which is, recycled from plastic bottles. With this step we want to start to take our part of the responsibility for our planet.
So in this new collection all club shirts, shorts/skirts and most of the Limited, Exclusive and Collab collections are made of 100% recycled polyester. We hope you will choose your next FZ FORZA product with this in mind and help us help the environment.

The process of making this recycled polyester is described below.



1. PET bottles are collected and chopped
2. Chopped bottles are processed into chips
3. After being washed the chips are melted into fiber
4. Yarns are pulled from the melted polyester
5. The raw filament yarns are spun into yarn then woven into a variety of different fabrics

On average 1 shirt uses around 25 bottles and 1 pair of shorts or a skirt uses around 15 bottles, meaning that if you have both you basically go on court wearing 40 plastic bottles!

All styles that are made of recycled polyester will be marked in the catalogue with this icon.

The product itself will have an extra hangtag in front of the normal one.

Packaging

From 2021 FZ FORZA has also started looking at packaging etc, to make sure we optimize our packaging to become more environmentally friendly where possible.

As you can see reading this catalogue we have also changed this to be printed on recycled paper.

FZ TECHNOLOGIES

ANTISTATIC

When moving around you create static electricity, but our fabrics prevent the garments from sticking to your body. To avoid your garments from being static, please do not tumble dry.

STRETCHABLE

Most fabric is stretchable either by knitting or due to added elastane. We make sure that the style has just the right stretch in order for the style to both fit the body and give comfort.

ANTI-PILLING

Our garments are made in fabrics either constructed to avoid anti-pilling or fabrics that are given an anti-pilling treatment. Even after washing several times, the surface will still look good.

ANTI SHRINK

All garments have been preshrunk to avoid size changing. Follow the care label and your FZ FORZA clothes should be your favorite badminton clothing for years.

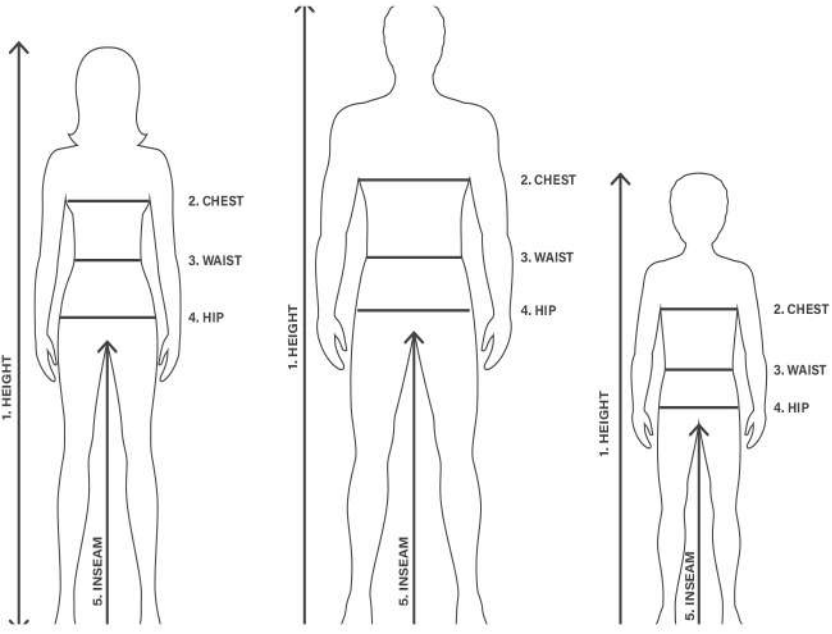
DRYFORZE

DryForze keeps you comfortable during the game! With the unique DryForze treatment, we ensure maximum comfort. DryForze makes the fabric perspiration transporting, quick drying and super pleasant to wear, and the DryForze capabilities will stay with your clothes for much longer than similar technologies. Fabric treated with DryForze has high breathability and a cool wearing comfort.

MEASUREMENT GUIDE

How to choose the right size

If your body measurements for chest and waist do not correspond with the same size, then choose the size which is closest to your chest measurement. If your are in between to sizes, then choose the smallest size for a tight fit or the bigger size for a loose fit.



WOMENS:

SIZE	2XS	XS	S	M	L	XL	2XL
Chest	78	82	86	90	94	100	106
Waist	62	66	70	74	77	80	83
Hip	87	91	95	99	103	109	116
Inseam length	77	78	79	80	81	82	83

MENS:

SIZE	XS	S	M	L	XL	2XL	3XL
Chest	92	96	100	104	110	116	122
Waist	78	83	88	93	98	103	108
Hip	93	97	101	106	111	117	123
Inseam length	80	81	82	83	84	85	86

JUNIOR:

SIZE	6	8	10	12	14
Chest	116	128	140	162	164
Waist	64	68	72	76	80
Hip	66	70	74	78	82
Inseam length	55	60	65	71	77

– Sizes: 36-39/40-43/44-47

FZ TECHNOLOGIES

F-ZONE

Our F-Zone Grip ensures excellent grip on the court which supports the slip resistance. F-Zone Grip consists of various patterns that support a variety of movements in badminton, so the grip on the court is optimal in all game situations. We only use rubber of the highest quality for our soles to ensure an extremely wear resistant outsole.

DRYLEX

Consists of special mesh layers and holes in the shoe that provides excellent breathability for the feet. Drylex helps transporting moisture away from your feet to keep them dry and comfortable.

ASE

By inserting this light weight TPU piece under the arch creates both a lighter and stronger shoe but also more stable. ASE supports the arch and helps prevent pronation and torsion in the shoe for increased functionality and comfort.

+By extending the ASE, the FZClaw appears on the lateral side of the forefoot. FZClaw significantly enhances the lateral stability of the foot and provides the shoe extra durability during intense and rapid transfer of direction.

TUCK BOARD

Our Tuck Board increases the shoe's torsional flexibility. Torsional flexibility supports the foot's natural movement and allows the foot to move faster. Our Carbon Tuck Board is made of three-dimensional carbon fiber sheets that support the torsional movement and reduce stress on the arch tendon.

FZORB

FZorb is a fantastic material for shock absorption. By molding the FZorb into the heel-area of the sole, it decreases the force of the many hard shocks that player's feet are exposed to during the game, as well as providing increased comfort for the player.

+ Is FZorb molded into the forefoot area of the sole, to provide greater shock absorption, particularly when jumping and sidestepping. In addition, FZorb+ enhances the comfort compared to FZorb.

++ For better shock absorption FZorb++ is the right choice. These shoes are provided with a hole under the heel, making room for an increased deformation of the material which increases the shock absorption.

LAT

The lateral stability technology enhances the durability of the shoe and the lateral stability of the forefoot during intense and rapid transfer of direction. Lateral stability is important in a badminton shoe when moving quickly around on court from side to side.

X-TECH

The ankle is exposed to twisting with the many sideways motions in badminton. A twist in the ankle is one of the most common injuries in badminton, but with the evolutionary FZ FORZA X-Technology the stability of the ankle is increased which prevents/reduces the twisting of the ankle.

DURA-COAT

Our high-tech microfiber PU treated with a thin coating. The combination of Dura-coat gives the shoe extreme durability and a unique abrasion resistance. Dura-coat is applied on areas where the shoe is most exposed for abrasion.

FLEXIBILITY	**F**	M	S	VS
REC. TENSION	30 lbs			

The HT Power 30 is a racket for the beginner/medium level player who focuses on power and good tension. This racket can be strung up to 30 lbs. The flexible shaft helps the player to optimize hitting power.

FZ TECHNOLOGIES

Kevlar®

Kevlar® is a very advanced material which combines great strength with light weight. The material is elastic and yet 5 times stronger than steel. Therefore Kevlar® has a lot of uses and is used for bulletproof vests among other things. When FZ FORZA uses Kevlar® in combination with graphite in the rackets we can make light and extremely strong rackets with a lot of power. Kevlar® helps absorb the shock at impact, making the racket feel soft and comfortable which lets you generate more power.

TITANIUM

Titanium is a very light and rigid material which is used to build space shuttles among other things. The combination of graphite and titanium increases the racket's durability and gives the racket increased control.

CARBON NANO TUBES

As we continue to improve our rackets and strive towards creating the best racket in the world, we continually research and develop new materials and ideas to take our rackets to the next level. Carbon Nano Tubes (CNT) is based on extraordinary small scale advancements in the material construction. Thanks to our cooperation with Aalborg University in Denmark, FZ FORZA is able to introduce world-class rackets manufactured using polymer composite materials modified by Multi-Wall Carbon Nano Tubes (MWCNT). Thanks to the MWCNT technology your FZ FORZA racket has improved durability in comparison with conventional rackets. The polymer resin that binds the carbon fibers together will ensure toughness and damage tolerance.

HM ULTRA HIGH MODULUS GRAPHITE

This material is used to enhance the performance in our very best rackets. The ultra high modulus graphite is stronger and stiffer than ordinary graphite, creating rackets that have less torsion and more power. This will give you more accurate and powerful strokes.

SLIM SHAFT

The slim shaft greatly reduces the air resistance when swinging and it greatly increases your swing speed but with less effort. The FZ FORZA slim shaft rebounds almost as fast as a conventional shaft, meaning that you get much more stability and accuracy, making it a superior choice when you are looking for a slim shaft racket.

SLIM FRAME

The slim frame is 12-18% thinner than conventional rackets. We achieve this by combining superior high grade materials and resins with our proprietary production methods to achieve a slimmer racket frame that moves faster through the air, without sacrificing power or torsion.

FRAME AIRFLOW

Our air flow frame reduces drag and air resistance during your stroke, enabling you to deliver more power and precision. Furthermore the more rigid T-joint construction offers a much more stable frame with almost no torsion, allowing you to put the shuttle exactly where you want it.

OVERSIZE

The slightly oversized frame helps increase the sweet spot for easier shot-making and increased fun while playing. The racket is still light and the special shape of the oversize head means that you will still be able to generate lots of power. The future of oversize rackets has started here.

FRAME

Combining the benefits of the hexa and octagon shape, this innovative shape gives you both increased strength in the racket, while being thinner on top. Decreased air-resistance combined with less torque makes this a precise, fast and durable weapon on court.

HEXAGON FRAME

FZ FORZA has developed a hexagon frame which is more narrow and stronger than usual. It gives reduced air resistance and less torsion. That means faster reactions, better control and more power.

FRAME OCTAGON

FZ FORZA has developed an octagon frame which ensures that the air flows around the frame with greater ease, thus increasing your reaction time. The frame is also more narrow and stronger than usual reducing air resistance and providing torsion. The frame design is extra durable, making you play stronger for longer.
